

Setting the Standard for Fitness Equipment Service

WHY CHOOSE A PREVENTATIVE MAINTENANCE PLAN?

Fitness equipment is becoming more complex as the digital age continues to take over. Equipment sold today requires regular service, cleaning, lubrication and software/firmware updates. Without preventive maintenance, most of these procedures will never happen, thus shortening the useable life of your equipment. A good maintenance plan will increase equipment longevity, maintain a good return on investment of your equipment, and create a safe workout environment for your clients.
